

Prodigio®

Pure // Protected

With Prodigio®, you can protect even your most sensitive products from drying out through oxidation. This large-diameter pack is 100% airless and neutral, with patented Clean Point® technology that features a mechanical closing of the exit tip to prevent the formula from drying on the actuator orifice. It has an excellent evacuation rate for high dosages, and offers a large communication area and multiple customization options to bring your brand to life.

Prodigio®

Defend against drying with our airless engine

- Patented Clean Point® technology with mechanical closing of the exit tip
- Pure Path™ technology for better formula protection
- Soft actuation for even the most viscous formulations
- Excellent evacuation rate thanks to airless technology
- Large communication area for branding
- Full pack solution
- Flexible integration into your atmospheric and airless filling processes
