

Mark VII® Max

Versatile // Powerful

Combining excellent priming with smooth actuation, Mark VII® Max gives your customers what they want—consistency and control. It is compatible with high-viscosity and difficult dermatological formulations, making it ideal for sprays, creams and more. With one touch customers can enjoy an easy and accurate spray experience.

Mark VII® Max

Smooth, controlled dispensing for a wide array of dermatology products

- Compatible with most high-viscosity formulations
- Spray and cream versions with excellent priming and smooth actuation
- Natural gasket for invisibility in translucent closures
- Variety of closures, heads, hoods and orifice cups for maximum flexibility and compatibility across platforms and product lines
- Inverted version available for upside-down spraying
